

ABOUT US

SK Engineering Solutions LLC evolved with a simple idea of serving customers with best products at competitive price. With over 5 decades of experience in precision machining, casting and forging, we have the capability to meet all the customer needs. We have been a one stop solution for our esteemed customers. Our pillar for success lies in our enthusiasm for innovative solutions to serve customers. At SK Engineering Solutions LLC., we always engage in learning and implementing newer technology for constant optimization of our products.

We have been serving OEMs for Automotive, Hardware, Cable, Pumps and various engineering industries. We have nurtured positive relations with all the clients through business ethics we have worked with to become their prime choice for sufficing engineering needs. We have been supplying parts overseas with a fine track record of ON-Time-Delivery. Currently, we have been serving US market from our warehouse in Charlotte, NC.
